

ERB has partnered with Certica Solutions to bring ERB members Pathways to Interpretation with TestWiz.

TestWiz is utilized for reporting and analyzing assessment data, including ERB assessments such as the CTP and WrAP, and optionally other assessments that ERB members may use. TestWiz provides a full view of student performance through comprehensive reporting and analysis of assessments that complement your ERB score reports - giving you powerful, on-demand analysis across a range of parameters to help inform decisions about instruction. With TestWiz, educators can:

- Import CTP and WrAP data with ease and accuracy;
- Disaggregate data by user defined groups of students;
- Analyze individual and group academic achievement results independently or with other assessment results;
- Track multiyear progress of individual students, classes, and cohorts using National, Suburban, or Independent norms;
- Generate easy-to-read, customized reports for staff, parents, and board members;
- Assign students to current teachers and produce class lists;
- Generate class lists or individual student reports based on any cutoff score; and
- Produce reports in rank order.

TestWiz Features

Feature	TestWiz: Option 1	TestWiz: Option 2
Multi-assessment longitudinal reporting	✓	✓
Student demographics and teacher assignments	✓	✓
Data loading and/or key-entry of supported assessment results	Up to two assessments	Unlimited assessments
